

YEAR: _____

Light and darkness

During winter, sunlight starts at its nadir and grows.

Month	Sun Rise	Sun Set	Day Length
January	10am	3pm	5 hours
February	9am	5pm	8 hours
March	8am	8am	12 hours

1 hour before the sun rises and after it sets the world is bathed in **dim light** during twilight. After which, the world is plunged into darkness, and characters without any assistance are effectively **blinded**.

Full moon. On the night of the 15th, and the morning of the 16, the bright moon bathes the world in **dim light**.

Temperature

The weather is abysmally cold, but slowly warming. Generally, the average temperature will work, but daily temperatures can vary up to 20 degrees from their average.

Month	Avg Low	Avg High	Extremes
Jan	-17°F	1°F	95% of nights and 45% of days are extreme cold
Feb	-13°F	10°F	95% of nights and 10% of days are extreme cold
March	-3°F	25°F	65% of nights are extreme cold

Precipitation and Cloud Cover

Winter is snowy. To determine the weather on a specific day, roll a d100 and consult the weather chart below.

d100	Weather	Effect
01-40	Clear	None
41-80	Cloudy	None
81-95	Precipitation	Lightly Obscured
96-100	Storm	Lightly Obscured, Strong Wind

Snow drifts. Unlike other precipitation snow often lingers. Snow drifts are considered difficult terrain and require double movement speed to get through. Once a blizzard comes through, all but the most well-maintained roads will be drifted until spring.

YEAR: _____

Light and darkness

During Spring, daylight waxes until it reaches its zenith.

Month	Sun Rise	Sun Set	Day Length
April	6am	9pm	15 hours
May	4am	11pm	19 hours
June	3am	1 am	22 hours

One hour before the sun rises and after it sets the world is bathed in **dim light** during twilight. After the sun sets, the world is plunged into darkness, and characters without any assistance are effectively **blinded**.

Full moon. On the night of the 15th, and the morning of the 16, the bright moon bathes the world in **dim light**.

Temperature

The weather is cool, but warming. Generally, the average temperature will work, but daily temperature can vary up to 20 degrees from their average.

Month	Avg low	Avg High	Extremes
April	21°F	44°F	
May	38°F	61°F	
June	49°F	72°F	

Precipitation

Spring has some gnarly storms. Roll a d100 and consult the weather chart below. This weather does not have to occur throughout the entire day but can show up at the DM's choice (i.e. it can be sunny around 10am and a storm can blow in at noon).

d100	Weather	Effect
01-50	Clear	None
51-75	Cloudy	None
76 - 85	Precipitation	Lightly Obscured
86-100	Storm	Lightly Obscured, Strong Wind

Flooding. After the snowfall melts (or after a storm) rivers and low-lying areas (like dungeons) could become flooded.

YEAR: _____

Light and darkness

During summer daylight starts at its zenith and begins to wane.

Month	Sun Rise	Sun Set	Day Length
July	4am	12am	20 hours
August	6am	10pm	16 hours
September	7am	8pm	13 hours

One hour before the sun rises and after it sets the world is bathed in **dim light** during twilight. After the sun sets, the world is plunged into darkness, and characters without any assistance are effectively **blinded**.

Full moon. On the night of the 15th, and the morning of the 16, the bright moon bathes the world in **dim light**.

Temperature

The weather in summer warmest, cooling quickly as it gets to September. Generally, the average temperature will work, but if you need a daily temperature, they can vary up to 20 degrees from their average.

Month	Avg low	Avg High	Extremes
July	52°F	73°F	
Aug	46°F	66°F	
Sept	35°F	55°F	

Precipitation

Summer has more clear days, although rain and storms happen with the same frequency as Spring. To determine the weather on a specific day, roll a d100 and consult the weather chart below.

d100	Weather	Effect
01-55	Clear	None
56-60	Cloudy	None
61-85	Light Rain	Lightly Obscured
86-100	Heavy Rain/Storm	Lightly Obscured, Strong Wind

18	19	20	21	22	23	24
25	26	27	28	29	30	Equinox

YEAR: _____

Light and darkness

During Autumn, daylight wanes.

Month	Sun Rise	Sun Set	Day Length
October	9am	7pm	10 hours
November	10am	4pm	6 hours
December	11am	3pm	4 hours

One hour before the sun rises and after it sets the world is bathed in **dim light** during twilight. After the sun sets, the world is plunged into darkness, and characters without any assistance seeing are effectively **blinded**.

Full moon. On the night of the 15, and the morning of the 16, the bright moon bathes the world in **dim light**.

Temperature

Fall is marked by decreasing temperatures. Generally, the average temperature will work, but if you need a daily temperature, they can vary up to 20 degrees from their average.

Month	Avg low	Avg High	Extremes
Oct	17°F	32°F	5% chance night is extreme cold
Nov	-6°F	11°F	75% of nights and 10% of days are extreme cold
Dec	-13°F	5°F	95% of nights and 25% of days are extreme cold

Precipitation

Fall has the same chance for rain, but fewer storms roll through. To determine the weather on a specific day, roll a d100 and consult the weather chart below.

d100	Weather	Effect
01-50	Clear	None
51-70	Cloudy	None
71-90	Precipitation	Lightly Obscured
91-100	Storm	Lightly Obscured, Strong Wind

Snow drifts. Unlike other precipitation snow often lingers. Snow drifts are considered **difficult terrain** and require double movement speed to get through. Once a blizzard comes through, all but the most well-maintained roads will be drifted until spring.
